Reliable Leak Detection Solutions

At ATEQ, we are dedicated to ensuring the highest standards of safety and quality across industries with our advanced leak detection solutions.

Our cutting-edge systems are designed to provide reliable and efficient performance, meeting the demands of today's manufacturing and service environments. With a strong focus on innovation and expertise, we strive to be your trusted partner for all your leak detection needs. Explore how our solutions can enhance your quality assurance processes and elevate your business.

Tracer Gas

- Our advanced tracer gas leak detectors use helium or hydrogen to offer exceptional precision and reliability in identifying even the smallest leaks.

He-490S

Comprehensive Leak Detection Services for Optimal Performance

At ATEQ, we provide a comprehensive range of services including calibrated gas leaks, a local calibration laboratory, on-site service, and flexible service contracts. Our offerings ensure that your equipment remains accurate, reliable, and efficient, supporting your operations with the highest standards of quality and performance.

Calibrated Gas Leaks

- ATEQ offers a high-quality line of calibrated gas leaks traceable to the National Institute of Standards Technology (NIST). Calibrated gas leaks are used to provide a controlled delivery of gases at a relatively low flow rate.

Local Calibration Laboratory & Services

- Our calibration laboratories provide precise calibration services to ensure the accuracy and reliability of your equipment. In addition to our labs, we offer local on-site services to support your operations efficiently. Trust ATEQ for top-quality calibration and service solutions tailored to your needs.
